

Palm Beach Industrial Market Overview

Market Observations

Economy

- The unemployment rate rose by 32 basis points year over year to 3.8%, matching the five-year average but exceeding the 2019 average of 3.4%, indicating softer market conditions.
- Job growth slowed to 0.6% year over year, lagging the national pace by 29 basis points, driven by job losses across all three office-using sectors in the market.
- Seven of the ten major employment sectors posted job gains over the past year, led by the education and health industry, which recorded a 2.4% increase.
- All industrial-using employment sectors grew with mining and construction, trade/transportation/utilities, and manufacturing sectors expanding by 0.6%, 0.7%, and 0.8%, respectively.

Major Transactions

- Premium Absorbent Disposables signed the largest deal of the quarter at the newly delivered Egret Point Logistics Center, securing 75,982 SF of Class A industrial space.
- Three of the top five notable leases took place in the North Central submarket of Palm Beach.
- Four of the five of the most notable deals in the Palm Beach area were new leases, highlighting the demand for space in the market.
- Leasing activity decreased quarter over quarter to 781,273 SF, of which 23.1% was for Class A space.

Leasing Market Fundamentals

- In the third quarter of 2025, the market reported 168,570 SF of positive net absorption, bringing year-to-date demand to positive 140,088 SF.
- Overall rental rates decreased by 3.5% year over year to \$13.25/SF and are expected to remain elevated, although the pace of growth will flatten in the short term as demand catches up to supply.
- The construction pipeline decreased to 626,857 SF, down 55.7% quarter over quarter, as the 457,396-SF Egret Point Logistics Center was delivered in the South Central submarket.
- Although demand was positive this quarter, the addition of new supply pushed vacancy rates higher by 110 basis points quarter over quarter to 9.2%. As demand slowly catches up to supply, vacancy is expected to remain elevated in the near term before steadily decreasing.

Outlook

- The Palm Beach industrial market will see a decline in new supply delivering to the market in the medium term, due to only 1.3% of the current market's inventory under construction.
- Vacancy rates are expected to remain elevated over the next few quarters as new supply from a robust construction pipeline is worked through.
- Increase in industrial-using employment sectors will drive up the demand for industrial space and will put downward pressure on vacancy rates.
- Asking rents are likely to continue easing in the near term amid elevated availability and softer demand. Incoming new supply will have minimal impact in lifting average rents given that 86.9% of these projects are already preleased.

Unemployment Rate Ticks Up While Job Growth Trails the Nation

Palm Beach County has generally maintained an unemployment rate below the national average, while outperforming in year-over-year employment growth. However, ongoing economic headwinds have begun to impact the local labor market. Over the past year, Palm Beach County’s unemployment rate rose by 32 basis points, while employment growth has decelerated by 93 basis points. Regional employment growth more recently began falling below the national pace beginning in October 2024. This trend has generally continued, except in the second quarter of 2025, with the third quarter of 2025 ending at 0.6% year over year, despite gains across all three industrial-using employment sectors.

All Industrial-Using Sectors Report Employment Gains

Palm Beach’s two largest employment industries account for 37.1% of the metro’s job base, with trade/transportation/utilities, accounting for the second largest share at 18.2%. Over the past year, all industrial-using industries posted employment gains, with the mining and construction, trade/transportation/utilities, and manufacturing sectors expanding by 0.6%, 0.7%, and 0.8%, respectively.

Industrial-Using Employment Remains Elevated Despite Slower Growth Pace

Trade/transportation/utilities employment rose 0.7% year over year to 128,953 jobs, sitting just 0.1% below the all-time high reached in June 2025. Meanwhile, employment growth pace is 32 basis points higher than August 2024. Manufacturing employment in the same time period increased 0.8% year over year and is now 1.6% below the February 2025 peak. Although year-over-year growth slowed by 87 basis points, manufacturing employment remains elevated at 22,693 jobs. Overall, both sectors continue to operate at elevated employment levels and reflect yearly growth.

Multifamily Maturities Particularly Elevated Through 2029, Industrial Not So Much

As of the third quarter of 2020, industrial loans comprised 25% of the outstanding \$65.7 billion of loans maturing within the next five years, representing the exposure to the industrial sector's challenges. The multifamily sector comprises 48.7% of upcoming maturities demonstrating its robust performance. Lenders continue to provide credit support, including forbearance, strengthening the capital markets focus on asset quality.

3Q25

Leasing Market Fundamentals

Vacancy Hits Highest Since 2011 as New Supply Surges; Demand Remains Positive

In the third quarter of 2025, the market posted 168,570 SF of occupancy, the strongest quarter over the past trailing year. Despite stronger demand, vacancy rose 110 basis points quarter over quarter and 130 basis points year over year to 9.2%, as an influx of 743,860 SF of new supply came online. Of the five deliveries, the highlight was two buildings delivered at Egret Point Logistics Center, adding 457,396 SF to the South-Central submarket. As of the third quarter of 2025, vacancy rates have climbed to its highest level since 2011, driven by 3.8 MSF of deliveries since 2023 and pushing the rate above the 20-year trend of 6.4%, that was most recently surpassed in the second quarter of 2024. In the near term, vacancy will likely ease from the recent high as eight under-construction projects totaling 636,857 SF are already 86.9% preleased.

Industrial Leasing Activity Remains High as Market Digests New Supply

Leasing activity totaled 781,273 SF in the third quarter of 2025, reflecting a 23.9% decrease quarter over quarter, but a 5.7% increase year over year. Meanwhile, quarterly deal volume outpaced third-quarter average leasing activity from 2019 by 21.8%. The average deal size also increased 8.8% year over year by 456 SF, indicating solid demand for slightly larger spaces amid ongoing deliveries.

Year-to-Date Class A Warehouse Leasing Share Outpaces Full-Year 2024 Levels

Class A leasing share is on track to break a two-year decline. As of the third quarter of 2025, year-to-date Class A volume accounts for 28.3% of leasing activity, up 346 basis points from 2024. Meanwhile, Class A leasing volume totaled 180,470 SF in the third quarter of 2025, down 60.2% quarter over quarter but up 234.2% year over year, reflecting the second-highest quarterly total since the first quarter of 2024. Notable activity includes a 75,982-SF lease at the newly delivered Egret Point Logistics Center, underscoring strong demand for new Class A product.

Preference for Modern Industrial Buildings Drives Demand

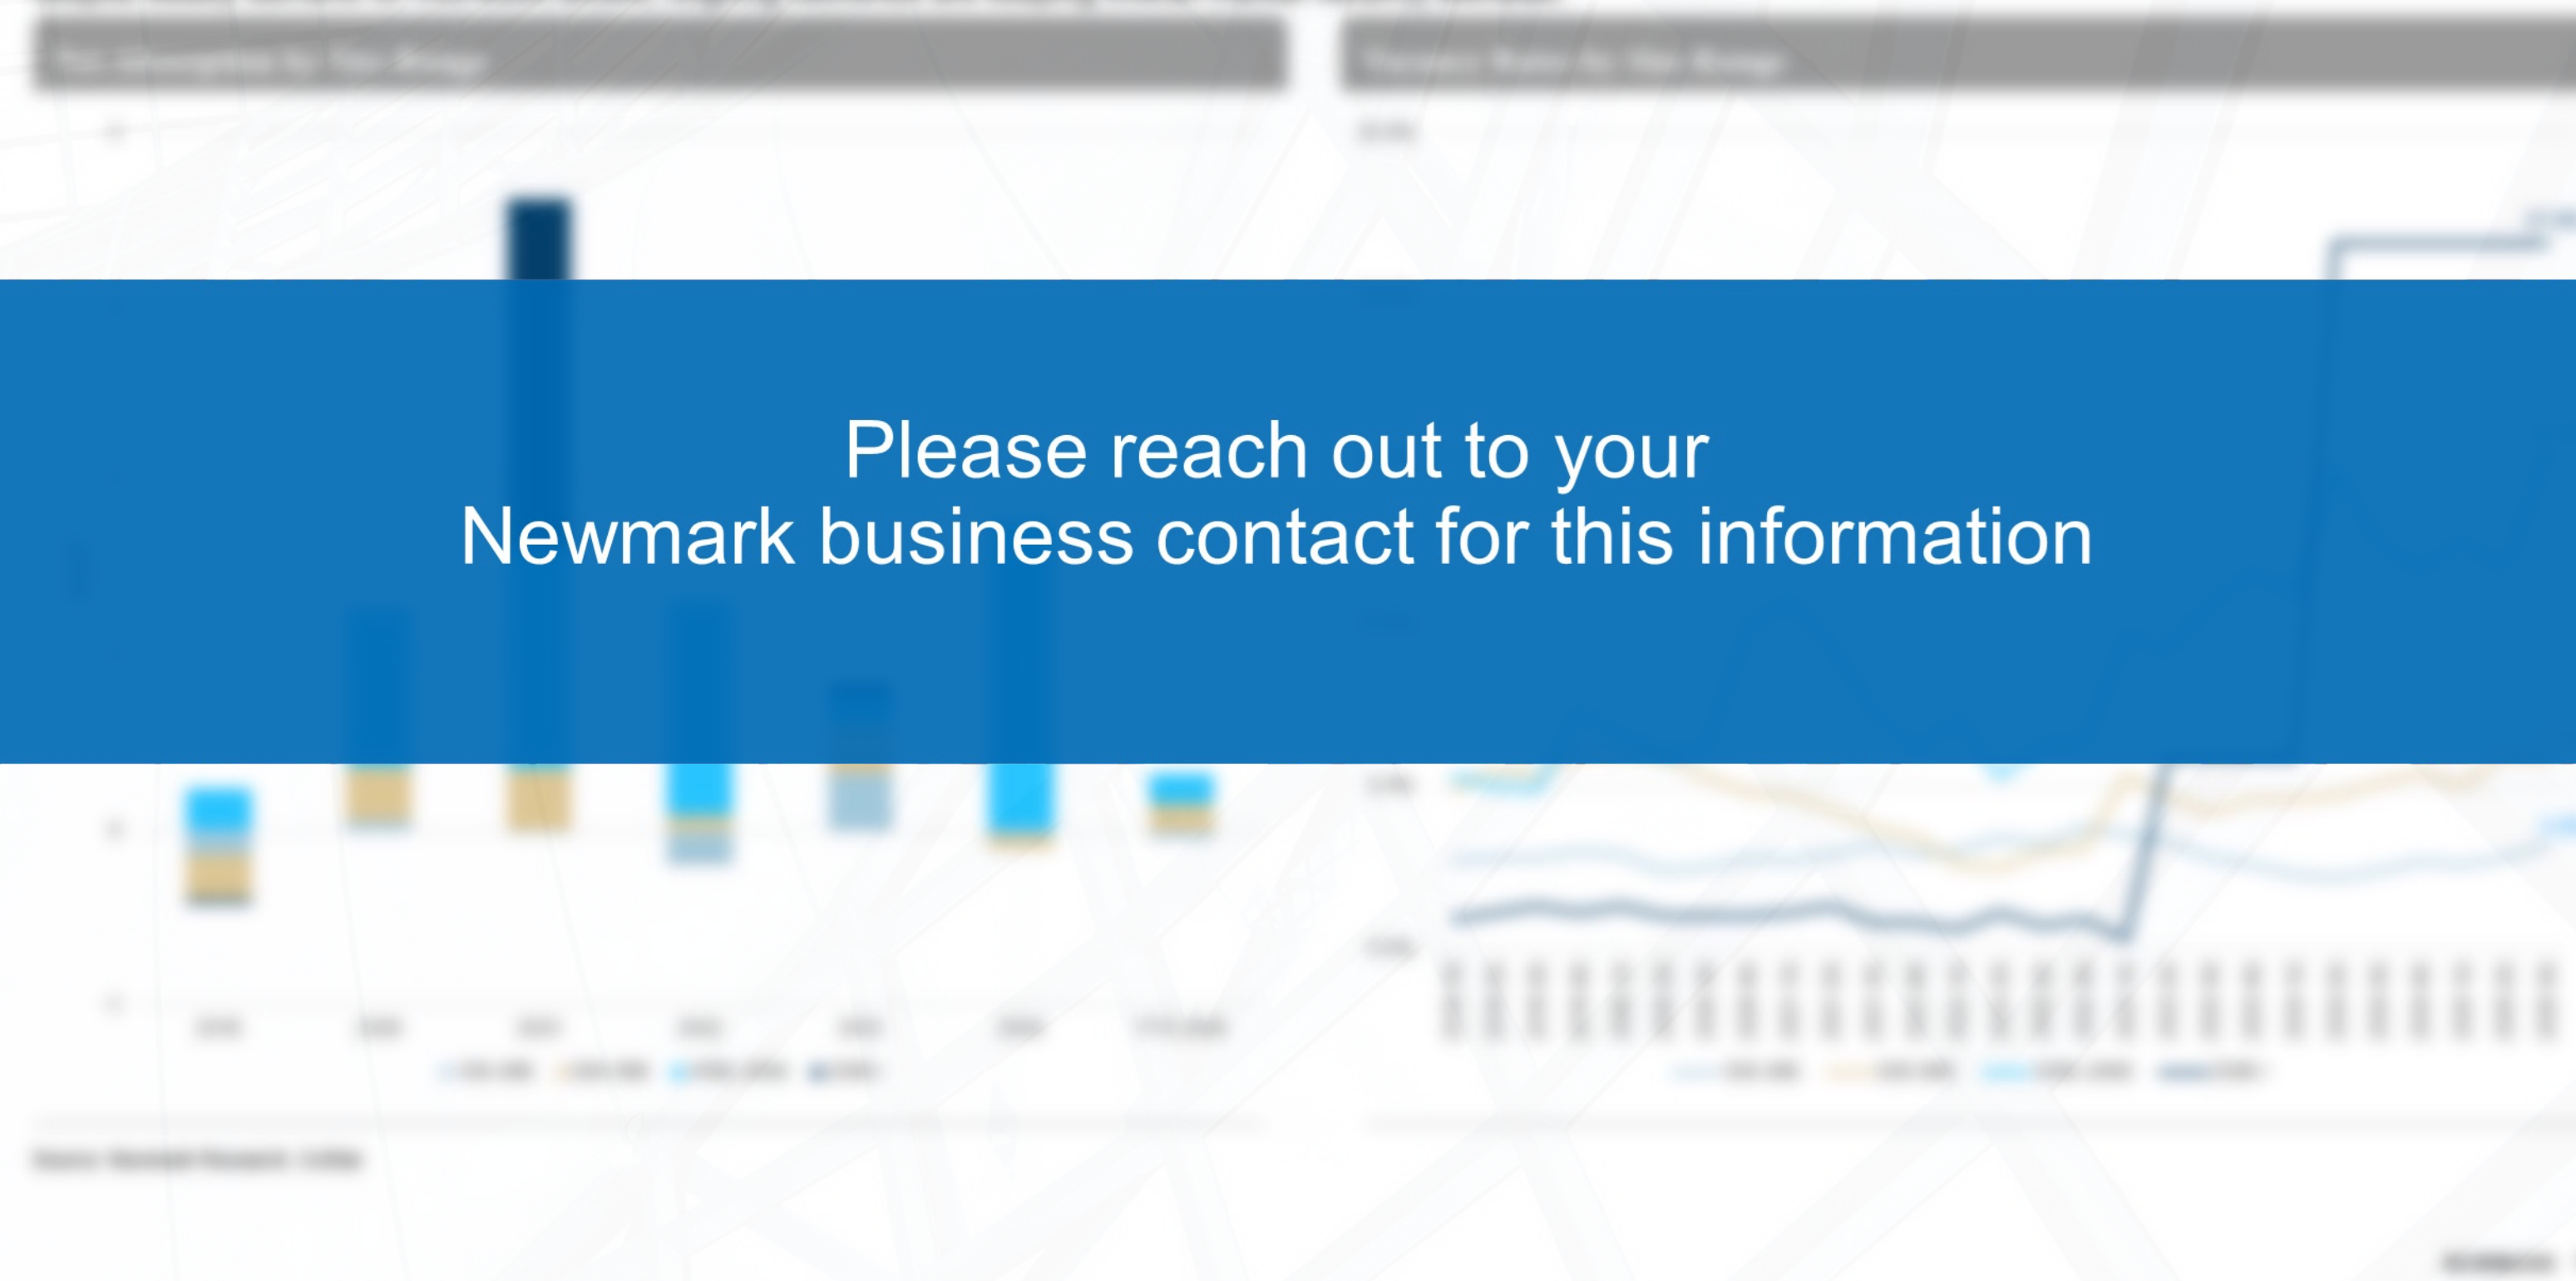

Modern industrial buildings, those built within the last 10 years, have captured the majority of new leasing activity over the past six years, underscoring strong demand for these facilities. Although these modern assets currently account for 15-17% of the market's overall space, their allocated capacity rate is largely a reflection of the recent surge in new supply. As modern buildings have gradually been coming onstream since 2010, there has been a corresponding negative net absorption over the same period. This trend suggests a softening of demand for older product as the market continues to add newer, higher quality, modern buildings.

Newmark business contact for this information

Mid-sized buildings, those 100,000 to 250,000 sq. feet, posted 50,000 sq. ft. of occupancy in the third quarter of 2020, and have accumulated 1.2 million sq. ft. of net absorption since 2015, the highest net adding rate among all sectors. Higher buildings, those 250,000 sq. feet and larger, with a close second with 1.1 million sq. ft. of net absorption since 2015, showing more for both sectors versus higher than for buildings under 100,000 sq. feet. Higher vacancy has held at an elevated 21.5% for six consecutive quarters, indicating prolonged time on the market. Mid-sized buildings are being rented quickly, however, increasing up 250 basis points quarter over quarter and 350 basis points year over year in the third quarter of 2020, indicating that despite steady demand for mid-sized space, ongoing deliveries are keeping overall market vacancy elevated.

Industrial Sublease Availability Decreases for Third Consecutive Quarter

Sublease availability declined for the third consecutive quarter to 99,824 SF, the lowest level since the first quarter of 2024, and reflecting a decrease by 21.1% quarter over quarter and 49.1% year over year. Meanwhile, quarterly leasing activity for sublease spaces hit 37,974 SF, reflecting a 438.6% year-over-year increase. In turn this led the market's sublease availability to continue declining in the quarter and remain below the 2012 to 2019 quarterly average of 190,251 SF for the third consecutive quarter. More recently, the market has only surpassed the historical pre-pandemic benchmark three times since the fourth quarter of 2020, indicating a return to more typical sublease availability levels within the market.

Source: Newmark Research, CoStar

First Break in Pipeline Growth Since 2024 Amid Heavy Third Quarter Delivery

The third quarter of 2025 was the first time the under-construction pipeline contracted since mid-2024. Under construction activity reached 626,857 SF in the quarter, accounting for 1.3% of the market’s inventory and reflecting a 163-basis-points decline of market share quarter over quarter. This indicates there is relatively low risk of overbuilding. Total space under construction is down 55.7% quarter over quarter, following the delivery of five projects in the third quarter of 2025, including the 457,396-SF Egret Point Logistics Center. Currently 86.9% of the pipeline is preleased and vacancy is expected to ease as future occupancies take place.

South Central Submarket Leads 2025 Deliveries, Commanding Nearly 87% of Market's Construction Pipeline

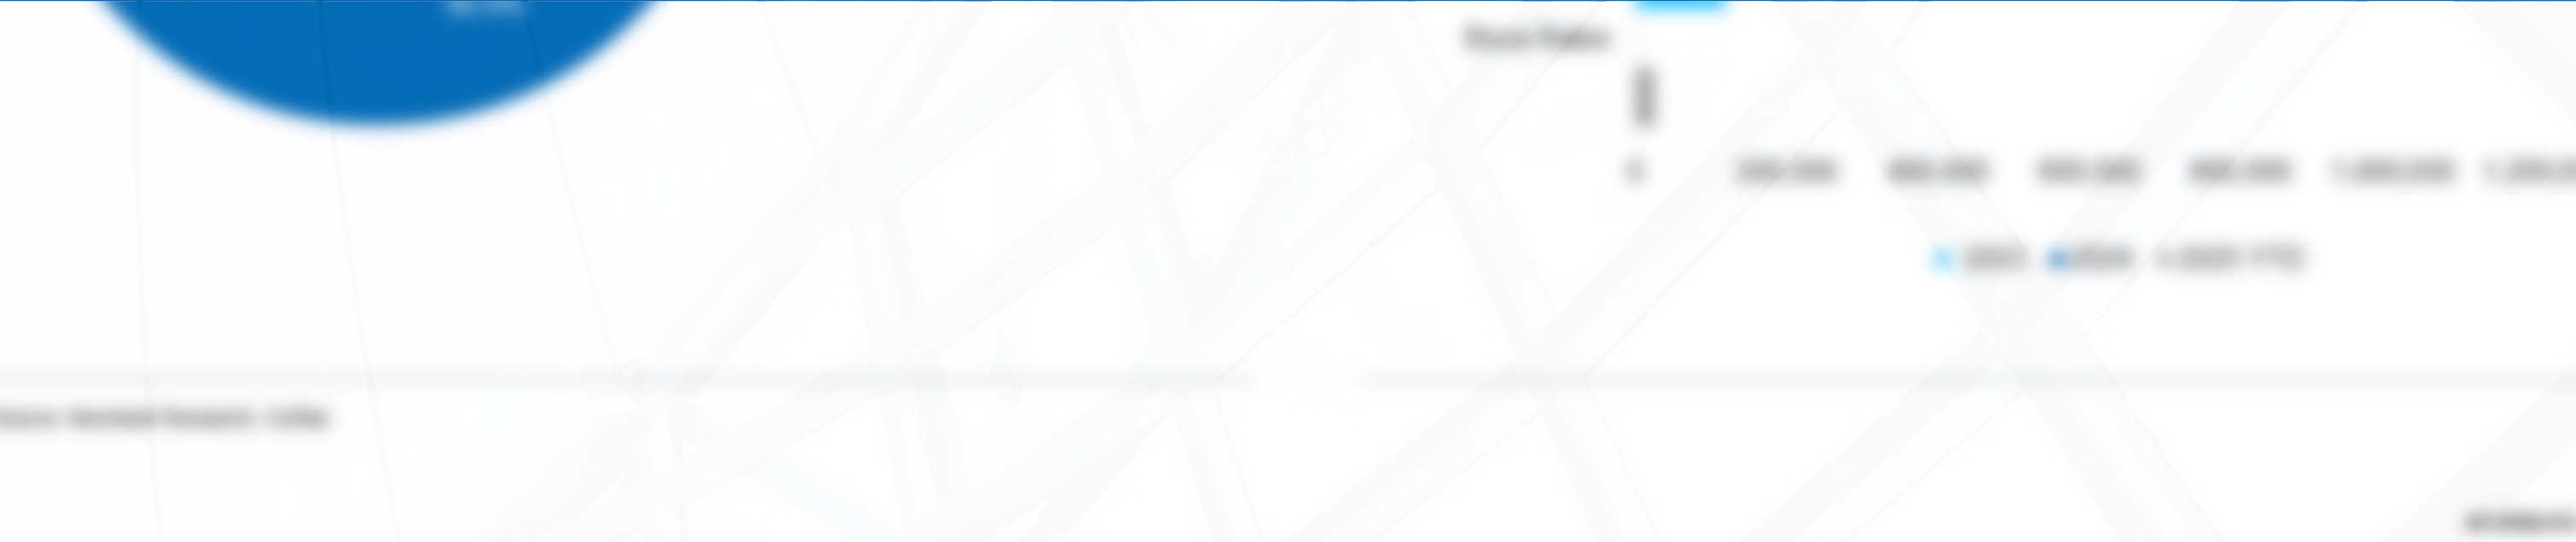

The South Central submarket has delivered the most units this year and is set to add more, capturing the bulk of market construction in 2025. The South Central submarket delivered 1,000 units in 2024, up from 800 in 2023. The South Central submarket is expected to deliver 1,500 units in 2025, up from 1,000 in 2024. The South Central submarket is expected to deliver 1,500 units in 2025, up from 1,000 in 2024. The South Central submarket is expected to deliver 1,500 units in 2025, up from 1,000 in 2024.

Asking Rents Continue Retreat from All-Time High Set in 2023

Industrial asking rents averaged \$13.25/SF in the third quarter of 2025, down 3.9% quarter over quarter and 3.5% year over year, and 5.8% below the all-time high of \$14.07/SF set at year-end 2023. Annual asking rent growth is on track to decline this year, marking a second consecutive contraction after six years of expansion. The slowdown began as the market became saturated with new supply pushing vacancy rates up. Asking rents are expected to remain flat amid softer demand and a heavily preleased pipeline at 86.9%, which limits the availability of new product to drive average asking rent increases at delivery.

Notable 3Q25 Lease Transactions

In the third quarter of 2025 leasing activity registered 781,273 SF, reflecting a 23.9% quarter-over-quarter decrease, but increased by 5.7% year over year. While Class A’s share of total leasing activity volume slipped 2,107 basis points from last quarter to 23.1%, Class A still accounted for four of the five top transactions—all direct new leases—signaling sustained demand for quality space within the market.

Select Lease Transactions				
Tenant	Building	Submarket	Type	Square Feet
Premium Absorbent Disposables <i>Premium Absorbent Disposables better known as Tite-Dri is a manufacturer of pads for the food packaging industry, will be among the first tenants at the newly delivered 457,396-SF Egret Point Logistics Center. The company currently occupies a 33,016-SF facility at 1480 SW 30th Ave, about a mile away, with this move likely an expansion.</i>	Egret Point Logistics Center	South Central	Direct New	75,982
