Market Observations

Economy

- The Greater Philadelphia economy experienced a slight uptick in unemployment for the 12 months ending in August, with the unemployment rate rising to 5.1%— 60 basis points higher than the national rate of 4.5%. However, the region grew payroll employment by 1.9% over the 12 months ending in August, a faster rate of growth than the national rate of 0.9%. The Education and Health Services sector, the region’s largest industry, remains the primary engine of employment growth, continuing to underpin the area’s economic resilience.
- For the 12 months ending in August 2025, office-using employment in the greater Philadelphia region grew by 2.0%, slightly outpacing the overall job growth rate for the same period. This growth was primarily driven by the region’s largest office-using employment sector—Business & Professional Services—which expanded by 3.4%, playing a key role in supporting overall employment gains within the Greater Philadelphia market.

Major Transactions

- The largest leases signed in 2025 included direct leases, renewals and subleases located in a diverse range of submarkets across the Southern New Jersey office market. This blend of sizable deals across various sectors and submarkets underscores a healthy level of diversity and resilience in Southern New Jersey’s office leasing activity.
- In June, Newmark sold Moorestown Corporate Center for the owner, Keystone Property Trust, to Melrose Solomon Enterprises. The corporate center comprises three buildings totaling 222,823 square feet. The building was sold for approximately \$17.6 million, or \$79 per square foot.

Leasing Market Fundamentals

- Southern New Jersey’s office vacancy rate stood at 13.8% as of the third quarter, representing a 110-basis-point decrease over the past year and signaling ongoing market stabilization. Net absorption totaled 184,988 square feet during the third quarter, bringing 2025’s year-to-date absorption total to 225,850 square feet. The combination of declining vacancy rates and net positive annual absorption underscores a strengthening office market and bodes well for continued improvement as the year comes to a close.
- Average asking rents in Southern New Jersey have fully rebounded and now surpass pre-2020 levels. Following substantial year-over-year gains in both 2022 and 2023, rent growth moderated in 2024 and saw a slight decline of 1.4% over the past year to average \$21.37 per square foot as of the third quarter.
- As of the third quarter, the percentage of active users relative to inventory ticked up to 1.8%, above the eight-quarter average of 1.6%. Market demand is being driven by tenants seeking an average of approximately 11,000 square feet of space. Notably, users that are new to market or growing their footprint account for approximately 46% of market demand, suggesting potential for future market growth.

Outlook

- The last new office delivery in Southern New Jersey occurred in 2019 at 2 Cooper Street in Camden. Presently, the absence of additional projects in the development pipeline is supporting market stability by preventing oversupply and keeping vacancy stable. For new construction to be feasible, market demand would need to increase enough to absorb an additional 200,000 to 300,000 square feet of office space per year, ensuring healthy occupancy and long-term viability for future projects.
- Declining vacancy rates and positive quarterly absorption are encouraging indicators for the Southern New Jersey office market as the year progresses. These improvements can be partially attributed to an increasing trend toward a 5-day in-office work week. This shift suggests renewed confidence in office-based operations and points to a potential uptick in office demand as 2025 comes to a close.

3Q25

Economy

Regional Job Growth Outpaces National Average

The Greater Philadelphia economy experienced a slight uptick in unemployment for the 12 months ending in August, with the unemployment rate rising to 5.1%— 60 basis points higher than the national rate of 4.5%. However, the region grew payroll employment by 1.9% over the 12 months ending in August, a faster rate of growth than the national rate of 0.9%. The Education and Health Services sector, the region’s largest industry, remains the primary engine of employment growth, continuing to underpin the area’s economic resilience.
